Summary

Software Engineer in Test who builds framework and CI/CD infrastructure. Co-developed a Selenium and PyTest suite at Ubisoft that raised team coverage from 60% to 82% as a pipeline quality gate, and ships personal frameworks in Playwright, Cypress, and PyTest with parallel execution and published reporting.

Technical Skills

- **Languages:** Python, TypeScript, JavaScript, Java, SQL, C++
- **Frameworks:** Playwright, Cypress, Selenium WebDriver, PyTest, Jest, Postman, Pydantic, ACCELQ
- **Infrastructure:** GitHub Actions, BitBucket Pipelines, Docker, Git, GitLab, Allure, pytest-xdist
- **Practices:** Test framework design, Page Object Model, API testing, quality gates, parallel execution, shift-left, flaky test triage, Agile/Scrum

Projects

API Quality Gate Framework | [GitHub](#) Feb 2026 – Mar 2026

- Built a **REST API** test framework of **53 cases** against the GitHub API covering functional correctness, error paths, and response-time SLAs, using **Pydantic v2** schema validation and session-scoped fixtures
- Cut suite wall-clock time with **pytest-xdist** parallel execution and published live **Allure** reports through a two-stage **GitHub Actions** pipeline

Dual-Framework End-to-End Test Suite | [GitHub](#) Mar 2026 – Apr 2026

- Implemented 20+ identical scenarios in both **Playwright** and **Cypress** in **TypeScript** on a shared **Page Object Model**, running 66 Playwright executions per run across Chromium, Firefox, and WebKit in parallel CI
- Published a measured comparison of the two frameworks on **execution time**, **flake rate**, and maintenance cost to justify framework selection

Work Experience

Software Developer Intern, Infyra LLC Jun 2026 – Present | Sheridan, WY

- Developed backend **REST API** endpoints and automated **ETL** validation against **PostgreSQL** and **MongoDB**, adding schema checks that catch pipeline defects before release
- Automated **KPI reporting** and **ML model validation** checks, standardising how accuracy and latency regressions are surfaced

Research Assistant, Michigan Technological University Jun 2025 – Jun 2026 | Houghton, MI

- Automated **Python** data pipelines processing structured financial datasets on Linux and Windows, cutting manual preprocessing effort **40%**
- Designed **KPI-driven evaluation** frameworks benchmarking ML model accuracy, latency, and reliability, accelerating research decisions **35%**

Software Engineer in Test, Ubisoft Entertainment Mar 2020 – Mar 2021 | Pune, India

- Co-developed the team's **Selenium** and **PyTest** framework, writing the test scripts and base architecture with **parameterized fixtures** and session-scoped state, raising team-wide coverage from **60% to 82%**
- Integrated the suite as a **quality gate** in **BitBucket CI/CD** pipelines, cutting regression cycles from **10 to 8 days** across 2 titles serving **40M+ users**
- Automated desktop **smoke testing**, reducing execution from **1 hour to 30 minutes** and freeing a 10-person QA team for exploratory work
- Validated **cross-platform** builds on desktop, Xbox, and **PS4/PS5** dev kits with **performance profiling** and controller latency checks, reducing inter-platform defects **35%**

QA Engineer, Expleo Group Oct 2019 – Feb 2020 | Pune, India

- Executed **300+ test cases** across 15+ physical **iOS** devices via **Xcode** and **TestFlight** for an app serving 100K+ users, cutting defect escape rate from **12% to 3%**

Education

Michigan Technological University, M.S. Computer Science, GPA: 3.50 Aug 2023 – Apr 2025

Savitribai Phule Pune University, B.Tech. Computer Engineering (Lateral Entry) Jun 2020 – May 2023

MIT Polytechnic, Pune, Diploma, Information Technology Jul 2015 – May 2019
