Summary

Software Development Engineer in Test who builds test frameworks and CI/CD infrastructure in Python and TypeScript. Co-developed a Selenium and PyTest suite as a pipeline quality gate, raising team-wide coverage from 60% to 82%. Building a FastAPI service that ingests results from four test frameworks and classifies each failure by root cause.

Technical Skills

- **Languages:** Python, TypeScript, JavaScript, Java, SQL, C++
- **Frameworks:** Playwright, Cypress, Selenium WebDriver, PyTest, Jest, Postman, Pydantic, ACCELQ
- **Infrastructure:** GitHub Actions, BitBucket Pipelines, Docker, FastAPI, PostgreSQL, Allure, pytest-xdist, Claude API
- **Practices:** Test framework design, Page Object Model, API testing, quality gates, test observability, root-cause analysis, AI-assisted testing, flaky test detection, shift-left

Work Experience

Software Developer Intern, Infyra LLC

Jun 2026 – Present | Sheridan, WY

- Develops backend **REST API** endpoints and automated ETL validation against **PostgreSQL** and **MongoDB**, adding schema checks that catch pipeline defects before release
- Automates **KPI reporting** and **ML model validation** checks, standardising how accuracy and latency regressions are surfaced

Research Assistant, Michigan Technological University

Jun 2025 – Jun 2026 | Houghton, MI

- Automated **Python** data pipelines for structured financial datasets and built **KPI-driven evaluation** frameworks benchmarking ML model accuracy, latency, and reliability, cutting manual preprocessing effort **40%**

Software Engineer in Test, Ubisoft Entertainment

Mar 2020 – Mar 2021 | Pune, India

- Led **smoke testing** for the desktop platform across two applications serving 40M+ users, cutting execution from **1 hour to 30 minutes** through automation and coordinating coverage on a 10-person QA team
- Co-developed the team's **Selenium** and **PyTest** framework, writing the test scripts and base architecture with **parameterized fixtures** and session-scoped state, raising team-wide coverage from **60% to 82%**
- Integrated the suite as a **quality gate** in **BitBucket CI/CD** pipelines, cutting regression cycles from **10 to 8 days**
- Validated **cross-platform** builds across desktop and mobile targets with **performance profiling** and input-latency checks, reducing inter-platform defects **35%**

QA Engineer, Expleo Group

Oct 2019 – Feb 2020 | Pune, India

- Executed **300+ test cases** across 15+ physical **iOS** devices via Xcode and TestFlight for an app serving 100K+ users, cutting defect escape rate from **12% to 3%**
- Traced crash log stack traces to **root cause** and filed structured defect reports in **JIRA** and TestRail, reducing average bug resolution time **25%**

Projects

Test Observability and AI Root-Cause Agent | [GitHub](#)

Jul 2026 – Present

- Built a **FastAPI** backend that ingests results from **Playwright**, **Cypress**, **PyTest** and Selenium into one normalised schema and classifies each failure by root cause: app bug, flaky test, environment, test data, or infrastructure
- Engineered the classifier as a **Claude** agent with 5 retrieval tools and a strict schema-validated verdict over measured evidence, with deterministic **LLM-free** clustering and **167 backend tests** under strict typing

Dual-Framework End-to-End Test Suite | [GitHub](#)

Mar 2026 – May 2026

- Implemented 20+ identical scenarios in both **Playwright** and **Cypress** in TypeScript on a shared **Page Object Model**, running 66 executions per run across Chromium, Firefox, and WebKit in parallel CI

API Quality Gate Framework | [GitHub](#)

Feb 2026 – Mar 2026

- Wrote a **REST API** test framework of 53 cases with **Pydantic v2** schema validation and **pytest-xdist** parallel execution, publishing live Allure reports from a GitHub Actions pipeline

Education

Michigan Technological University, M.S. Computer Science, GPA: 3.50

Aug 2023 – Apr 2025

Savitribai Phule Pune University, B.Tech. Computer Engineering (Lateral Entry)

Jun 2020 – May 2023

MIT Polytechnic, Pune, Diploma, Information Technology

Jul 2015 – May 2019
