Summary

SDET with **2+ years of industry experience** designing test automation frameworks and validating multi-platform software across PC, console, mobile, and web. Architected a **Selenium/PyTest** framework that raised coverage from **60% to 82%** and built a production **REST API test suite** with CI/CD-integrated reporting.

Technical Skills

- **Languages:** Python, TypeScript, JavaScript, Java, SQL, C/C++, C#
- **Test Automation:** Playwright, Cypress, Selenium, Postman, ACCELQ, Jest, Pydantic, PyTest, Allure, TestRail
- **CI/CD & Tools:** GitHub Actions, BitBucket, Docker, Git, JIRA, Xcode, TestFlight, MongoDB, MySQL
- **Disciplines:** Test Framework Design, Test Infrastructure, Page Object Model (POM), API Testing, Shift-Left Testing, Regression, End-to-End Testing, Cross-Browser, CI/CD Integration, Agile/Scrum, Defect Management

Work Experience

Software Developer Intern – Infyra LLC

Jun 2026 – Present | Sheridan, WY

Contributing to backend REST API development and data pipeline analysis in a production environment, with hands-on exposure to PostgreSQL, MongoDB, and automated ETL workflows. Assisting with technical KPI reporting and ML model validation under senior engineer supervision.

Research Assistant – Michigan Technological University

Jun 2025 – Jun 2026 | Houghton, MI

- Automated **Python** data pipelines to collect, clean, and analyze structured financial datasets on **Linux** and **Windows**, cutting manual preprocessing effort by **40%**
- Designed **KPI-driven evaluation frameworks** to benchmark ML model accuracy, latency, and reliability, improving experiment comparability and accelerating research decisions by **35%**

Software Engineer in Test – Ubisoft Entertainment

Mar 2020 – Mar 2021 | Pune, India

Consumer software company delivering complex, large-scale applications across desktop, console, and mobile environments.

- Streamlined **smoke testing** for the desktop platform across 2 titles serving **40M+ users**, cutting execution time from **1 hour to 30 minutes** through scripted automation
- Built automated test scripts with **parameterized fixtures** and session-scoped state for the team's **Selenium/PyTest** framework, raising test coverage from **60% to 82%**
- Integrated **Selenium** suites and smoke tests as quality gates in **BitBucket CI/CD** pipelines, reducing regression cycles from **10 to 8 days**
- Validated builds across desktop, console (**Xbox, PS4 & PS5 dev kits**), and mobile via **performance profiling** and hardware compliance checks, reducing inter-platform defects by **35%**
- Managed the full **defect lifecycle** in **JIRA**: triage, root cause analysis, and closure across platform teams under **Agile/Scrum**

Software QA Engineer – Expleo Group

Oct 2019 – Feb 2020 | Pune, India

Global quality engineering company providing testing services for enterprise mobile applications serving 100K+ users.

- Designed and executed **300+ test cases** across **15+ iOS devices** via **Xcode** and **TestFlight**, reducing defect escape rate from **12% to 3%** for an app serving **100K+ users**
- Traced crash log stack traces in **Xcode** to root cause, delivering structured defect reports via **JIRA** and **TestRail** that cut bug resolution time by **25%**

Projects

Dual-Framework End-to-End Test Suite | [GitHub](#)

Mar 2026 – Apr 2026

- Implemented **20+ identical end-to-end scenarios** in both **Playwright** and **Cypress** against a production-style e-commerce app using **TypeScript** and the **Page Object Model**; Playwright suite runs across Chromium, Firefox, and WebKit (**66 total executions**), with parallel **GitHub Actions** CI/CD and a data-driven framework comparison document

API Quality Gate Framework | [GitHub](#)

Feb 2026 – Mar 2026

- Engineered a production-grade **REST API test framework** with **53 test cases** covering functional correctness, error paths, and response time SLAs; used **Pydantic v2** schema validation, session-scoped fixtures, and **pytest-xdist** parallel execution, deployed with live **Allure reports** through a two-stage **GitHub Actions** pipeline

Education

Michigan Technological University

Master of Science, Computer Science, GPA: 3.50

Aug 2023 – Apr 2025

Houghton, MI

Savitribai Phule Pune University

Bachelor of Technology, Computer Engineering

Jun 2021 – May 2023

Pune, India
